AUTHOR RIGHTS

Publishing contracts often include the assignment of some or all of an author’s copyright to the publisher. If you have published an article that you intend to use in your dissertation you may need to check with your publishers author rights policies or request permissions in order to include the content in your ETD.

REQUESTING PERMISSIONS

If you are using content that someone else created in your ETD, you will probably need to request permissions. One of the formal ways you can obtain permissions is to get a license for your use from a publisher. Many scholarly publishers today use a system called Rightslink, offered by the Copyright Clearance Center.

While viewing an article on the journal’s web pages you may see a link for ‘rights and permissions’ or ‘request permissions,’ ‘reprints and permissions,’ or ‘get rights and content.’ These buttons will take you to a RightsLink page where your answer to a few questions will either inform you of journal policies or allow you to obtain an official license for your use.

CREATIVE COMMONS

Many authors and artists are issuing their work with creative commons licensing. This is a license scheme designed to let creators advertise to their users what kind of uses they allow above and beyond copyright law.

The Library’s Copyright Guide has a collection of resources you can search to obtain images and media that fit your needs and are free for you to use:

http://guides.lib.usf.edu/c.php?g=5784&p=2753294
NOTES TO THE READER

A figure note or note to the reader should come alongside or in advance (in the case of a whole chapter) of the copyrighted material. It usually includes the full citation of the original publication in the style of your paper, the copyright notice, and, if you are using it with permissions.

PERMISSIONS APPENDIX

Terms and conditions and author rights statements can all be changed by the copyright owner over time. By capturing the license and conditions of use statements when you submit your ETD you can guarantee to show that you abided by the terms as they were if in the future your use comes under question. When relying on a fair use argument for the inclusion of material in your ETD, including a fair use checklist or explanation of that argument is also a good idea to show that you were careful and considerate about your use at the time.

Find more information on figure notes, notes to the reader, and permissions appendixes on the library guide:

https://guides.lib.usf.edu/articlerights

INCLUDE IN YOUR APPENDIX:

1. RightsLink Licenses
2. Emailed permissions
3. Author Rights Statements
4. Terms and Conditions screen shots
5. Creative Commons Licenses
6. Fair Use Agreements
